

REVIEWED

GPS AND RADAR DEVICES

ADAPTIV Radar Detector

- Fully integrated portable motorcycle radar and laser detection system
- Wireless headset alerts detection through earphone
- Visual alert includes an LED to keep eyes focused on the road
- Wiring harness connects to power source making installation easier
- Certified and proven to work by an independent evaluator

SSB SAYS: Tickets suck. Protect yourself from the quick draw of a cop's radar gun with a detector designed specifically for a motorcycle.

GARMIN Zumo 665

- Bright 4.3-inch touch screen color displays information in an easy-to-read format
- Rugged waterproof case resists fuel spills and UV rays
- Optional XM subscription can receive real-time XM Radio
- Bluetooth wireless compatibility allows use of a cell phone without having to remove gloves or helmet
- Can double as an in-car navigator

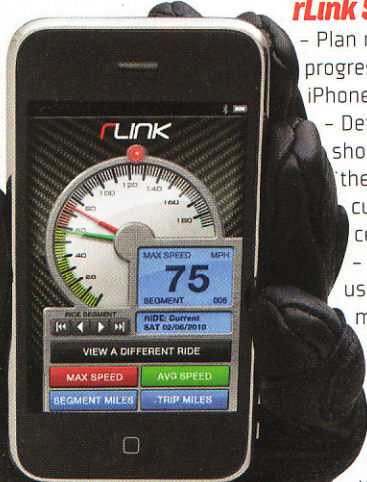

SSB SAYS: This mobile monitor can handle phone and music duties as well as keep you from getting lost. The ability to use it in a car quadruples its duties.

SCORPIO rLink SR-i1100 Alarm

- Plan rides on my.rlink.com and monitor progress with detailed trip stats from an iPhone
- Detects location, movement, speed, shock, tilt and ignition status and then the information is transmitted to a secure tracking server, which can be accessed by an iPhone or over the web
- Group Ride feature allows multiple users to connect and share trip information
- Geofences send alerts when entering or exiting the pre-established perimeters
- Upload ride stats and maps quickly and easily to Facebook and Twitter with rLink social networking interface

SSB SAYS: Here's the ultimate gadget geek's GPS. If you are one of those people that must blog, Facebook or Twitter every time you ride, the immediate social interface is worth the price alone. With all the security features there's no hiding from the long arm of the rLink.
