## ***TPX™ Motorcycle Laser Jammer System* Receives Five Star Rating; Adaptiv Technologies Announces Price Drop**

Santa Monica, CA - November 17, 2011 - Adaptiv Technologies™ announced today that the price of the TPX™ Motorcycle Laser Jammer System will be reduced to \$499 starting on this year's "Black Friday" (November 25).

According to company CEO Wayne Chen, the price reduction is part of their commitment to their customers.

"We are always trying to find ways to make our products more affordable to our customers," Chen said. He added, "We are able to reduce the price now because we have recuperated some of the initial development costs associated with the product. It's the exact same thing that we did with our Radar Detection System, where we dropped its price a few months after we launched it."

Earlier this year, the TPX™ Motorcycle Laser Jammer System received a prestigious Five Stars Rating from Radar Roy, one of the most trusted speed detection experts in the field today. Radar Roy touted the TPX™ Motorcycle Laser Jammer System as his "#1 pick for motorcycle laser protection."

"Radar Roy" Reyer is a retired police officer and a certified radar instructor based out of Arizona.

Adaptiv Technologies is the designer and manufacturer of aftermarket motorcycle products. For more information, go to [www.AdaptivTech.com](http://www.AdaptivTech.com) or call 866-232-7848.
